## Is first page always \"hard\" and low resolution?

Posted by WWA - 2014/06/28 01:04

---

I've made a publication where page images are 216 ppi so they remain sharp at 3X zoom. All pgs zoom properly except the cover which enlarges soft and blurry. Also the cover is hardcover even though it is set not to be. Both of these problems appear on your demo also. Is there a way to fix this?

Hello,

Could you send a screenshot with comments where we can see the problem by email?

Regards,
