Upload Size on Import PDF File

Posted by pisd - 2014/07/25 21:48

_____

Hi!

I'm using Ari Smart Book, and I'm working with PDF files.

I need to use the Uploader from Import Data but I can't beacuse my files are bigger than the maximum default size of 2MB.

How can I increase this?

Ty

_____

Hello,

Maximum size for uploaded files is limited by "upload_max_filesize" and "post_max_size" PHP parameters. You can increase values of these parameters to increase maximum size for uploaded files.

_____

Hi,

Where can I find the PHP parameters?

Regards,

Marcelle

_____

Hello,

They are defined in PHP.ini file. Values of most PHP parameters are shown on "System -> System Information -> PHP Information" page on Joomla! backend. You can try to use "PHP Settings" Joomla! plugin to change values of some PHP parameters.
