## Incorrect Page Order When Uploading PDF

Posted by elombard - 2014/11/21 10:46

---

Hi,

I've uploaded the books through the pdf import tool but the pages are in the wrong order (except for the front page).

Please assist.

Regards,

=====

Hello,

Send screenshot(s) of "Pages source" parameters section from book settings and a link to a page with the book by email please so we can investigate the problem.

Hi,

I figured out what the problem was. When importing the PDF Ari Smart Book saves the pages as 1,2,3,4,5 etc. When it is saved in the Joomla folder it is ordered as: 1,10,11,12,13,... 2,20,21,22,23... which causes the pages to show incorrectly in the book.

We've manually changed the image names in the database, but this is a long-winded solution that we won't always be able to implement.

Is there a way to change the indexing parameters of the module when it uploads a pdf?

Thanks.

Hello,

The extension sorts images files with these file names fine. Check that "Pages source -> Sort by" parameter is set to "File name" value and "Pages -> Sort direction" to "Ascending" in book settings:
