## Smartbook is not showed, only controls are display

Posted by jajsuscrip - 2015/04/11 19:03

---

Hi!

I have a problem in my site. I am trying to display a book in the page

### Product Details

In product details, I'm trying to display book in the tab "Instalacion y montaje", that are below the thumbs of the product.

When open this tab, under the thumbs, the book is not showed. But .. when click over the zoom +, and remove the zoom, the book is showed!

Also, i can't have 2 instances of book in same page, for example, i would like to enclose another tab with another book, but if I do that, Then, book 1 and 2 are not showed.

I have tested installing JQuery easy, and all that i have read in this forum but doesnt work. I have sent email with the access data to my site.

Thank you very much and wish a nice weekend!  
Amparo
