## Categories listing with number of items in each.

---

Would it be feasible to provide a categories list with the number of books contained in each. I am creating a website that is for authors and readers. The list of categories can already be displayed and therein select the books from within it each. My method is as follows:

Fiction  
..Humour & Comedy  
..Romance  
..Science Fiction  
..Crime  
..Thriller & Horror  
..General  
Non-Fiction  
..Art & Craft  
..Cars and Transportaion  
...Cars  
....Sport  
....Luxury  
....

etc.

What I would like is a counter in square brackets.

Fiction  
..Humour & Comedy  
..Romance  
..Science Fiction  
..Crime  
..Thriller & Horror  
..General  
Non-Fiction  
..Art & Craft  
..Cars and Transportaion  
...Cars  
....Sport  
....Luxury  
....Family  
...Aircraft  
...

Each category counts the sub-categories and displays that count (although not really important), etc. Finally the sub category leaf node hold the number of books (this is my most important requirement).

Hello,

We will think about implementation this feature in a future version of the extension.

Regards,  
ARI Soft
