oading time osted by flyingfinn64 - 2015/09/26 01:11
ello I use air smart book on this page ww.yonmag.com
he loading time takes forever sometimes over five minutes.
/hat is the problem?
hank you in advance

ello,
pading icon can be shown constantly if a javascript script conflict occurs on the page. We have checked the book on our site and it is working fine in FireFox browser. What browser do you use?

tested on Firefox chrome and safari. Sometimes page never loads especially on tablets and phones. But I can t find the roblem. can you help me? Where is the conflict if it occurs one?
hanks in advance
Re:Loading time  posted by admin - 2015/09/27 07:56
/e can't reproduce the problem (checked in FireFox, Safari and Google Chrome), but try to upgrade the extension to the test version (v. 1.8.8, v. 1.7.0 is installed on your site) and set "Book settings -> Images lazy load -> Enable" parameter or "Yes" in template settings.

id them and I think the problem in pc bettered. But in tablet and phone with wifi problem persists. Load time in iPad for xample when I slide to second and third page takes forever and never loads. Is there a conflict there; I note that I have ne scpript.js version you sent for no zoom in mobile devices
