
Hyperlinks

Posted by Jmcbean - 2016/03/18 18:24

Is there an easy way to hyperlink text within an article to the ARI-Smart Book?

Hello,

Do you want to create a link which will open the specific page into a book or need something another?

Regards,
ARI Soft

At this point a hyperlink from text within an article to open a specific book. Although a link to a page within a book would be a nice feature as well.

For Example: An article within Joomla with a picture and description followed by the assembly/installation manual links

Base Assembly Section
Top Assembly Section
Installation Instructions

Thanks
John

A link to specific book looks like:

`index.php?option=com_arismartbook&view=book&bookId=BOOKID`

Where BOOKID is ID of book which want to open.

Add #page/PAGENUM hash link at the end of link to the book to navigate to specific page. Replace PAGENUM with number of page which want to open. "Book settings -> Hash links enabled" parameter should be enabled in template settings (see "ARI Smart Book -> Templates" page on component backend). A sample link below:

`index.php?option=com_arismartbook&view=book&bookId=1#page/5`

Thought I tried that.. Must have missed something.

Thank you!

If something doesn't work, we can investigate a problem if you provide a link to a page where the problem occurs.
