Tabs Issue
Posted by davec62 - 2016/04/27 16:23

Hi

I have just purchased the smartbooks and created a book for the site. Now there seems to be an issue with tabs. I use Regular Labs - Tabs (NoNumber). The page containing the flipbook is in the last tab and unless I reload the page I get an a small book and the navigation is out of line as per attachment.

Advice appreciated

Thanks

Hello,

The problem occurs because the book is located in invisible area (in tab) and it can calculate available size (it equals to 0 for hidden elements).

Hi

I have checked my email and apart from the notification for this post I do not see anything else? Can you resend if possible and also let me know the address it is sent from so I can whitelist it

Hi

I have still not received any updated files. Not sure if they have yet been sent?

Hi

I have now received the file. Thanks very much for your help.

I wonder would it not be a good idea to use that files as part of the standard installation?

Thanks

Dave B)

We will think about it. Probably add a new parameter to template settings.
