## How to make like your demo ARI cloud carousel pro?

Posted by xboby - 2017/09/12 09:42

---

Hello, Would you please tell me step by step, how can I make my own photos and images exactly as like as your beautiful ARI cloud carousel pro demo page?

Thanks,

=====

Hello,

It uses nothing special. Only a background image and show images from the selected folder.

Regards,  
ARI Soft

Hello,  
Please help me to make a background image like that at your demo.  
How can I make it, I do not have an idea?

Thanks,

=====

Hello,

Use "Path to background image" parameter in module settings to specify an URL (it can be a relative) to a background image. For example if you want to use /images/bg.jpg as a background image, populate the parameter with following value:

images/bg.jpg
