Raw HTML on Hover of Thumbnail

Posted by Ellsinore - 2017/09/26 17:51

_____

Thank you so much for pointing me to this plugin. It's perfect for what I'm needing to do and has greatly reduced my workload.

After I finish a cemetery, I run a script which automatically generates the .csv and includes a link to the info page for that person. My only problem is the hover text on the thumbnail which shows, of course, the raw HTML for the link.

This isn't a big deal, but if there's a way to avoid it, I'd like to do that.

Thanks! http://www.ari-soft.com/images/fbfiles/images/ss_hover.jpg

_____

Hello,

Do you want to disable this tooltip?

Regards,
ARI Soft

Thanks for the prompt response. Yes, I would like to do that and I did check the settings for the plugin but didn't find it there. Thanks!

_____

Download and upgrade the extension to v. 1.0.3. It adds "Hide titles" parameter to "Advanced" tab on "System - ARI Magnetic Popup" plugin settings page.

Regards,

ARI Soft

_____

Thank you for the quick response! I downloaded, installed, and used the setting to hide the titles, but the tool tip is still showing? I also cleared my caches. Is there another step I should take? Thanks! :-)

_____

What browser do you use? We checked it in Google Chrome and Safari, the titles are not shown in browser's tooltip. Try to open a browser in incognito mode to avoid cache problem and check it again.

_____

Hi! I've checked it on both Google Chrome and Firefox and incognito windows. The tool tip is still showing, but since it's working for you, it must be something in my settings. I have time to work on it more this weekend and will get back to you. Thanks for the help! :-)
