
Export of Quiz Data

Posted by tectonicchris - 2017/06/15 23:21

Hi,

I don't seem to be able to export the data from the survey, just the score. That seems like a really missing feature.

Can you advice please?

Thanks!

Hello,

The plugin doesn't export detailed results (questions with answers), it exports number of earned score / personality type, quiz name, quiz taker name / email.

Hi,

This would seem to be a feature that is missing. Any plans to do this or could you supply it bespoke?

Thanks

Hello,

We can implement it as a custom feature. Contact us by email please and we will discuss details.

We agree - export and import would be really useful. Not at least in order to keep collecting data for safe keeping. Please add this functionality in the main plugin in the future and not only for one client. +++

Export/Import quizzes feature in our TODO list. It will be available in a future version of the plugin.
