
Sharing Message and Image won't update

Posted by crystallynn126 - 2017/07/16 11:17

Hello! Can you tell me, please, how to change the information or blurb that gets displayed as the description of the quiz in the social media shares box (particularly Facebook?) Right now, it is pulling the old material that I have since modified and updated from page on which the shortcode is entered. I pretty much changed all the text and images and it is still using the old text and image. How can I get it updated?

Hello,

It is possible to use Facebook debug tool to clean cached results.

Regards,
ARI Soft
