
Next page button on multipage quizzes

Posted by mrswisesturt - 2017/08/08 11:32

Might be missing something really obvious here but can I have a Next Page or Continue button at the bottom of each page of a multipage quiz rather than it just jumping to the next page when the last question is answered?

Hello,

Open "SETTINGS" tab on quiz settings page and uncheck "Multi pages -> Use 'Continue' button to navigate to the next page" checkbox.

Thanks but if I uncheck multipage then the quiz just shows all on one page - there is no Continue button option either way

Uncheck only "Multi pages -> Use 'Continue' button to navigate to the next page" checkbox, "Multi pages" checkbox remain checked:

This is option is not available for personality tests because it doesn't make sense for this quiz type. Could you provide a link to a quiz where the problem occurs so we can investigate it? If it is private, you can send it by email.

Not sure why it doesn't make sense for personality quizzes? Link is here:

<http://uppity-twig.flywheelsites.com/sma-test-page/>

It means that if people click on the last answer and make a mistake they can't change it before going to the next page

user: flywheel
pass: tested-tax

We will add ability to show "Continue" button to review answers and submit them when page is completed for personality tests in a future version of the plugin. Support it will be available within 3 weeks.
