
Personality Quiz - Points

Posted by marcioaltoe - 2017/12/31 15:11

Is it possible to use different points from the existing options for personality tests?

I have a quiz where I need to punctuate each personality (there are 4) between -28, -27, -26 ... 0 ... 26, 27, 28

Hello,

Currently it is not possible to enter custom points, but we will extend plugin API and add a custom filter to adjust score list with custom score in the next version of the plugin.
