Can I click on image to have lightbox popup
Posted by vmurphy - 2010/12/06 15:08
_____

Hi,
  I'm thinking of using ARI Magnifer but would like to know if I can make it open a lighbox when I click on the image. Something like zoom magnify plus which I tried but I'm having problems in IE 7/8. This is inside a K2 item which might also be my problem. Any info appreciated.

Hello,

Currently the extension doesn't provide this ability, but we add this possibility in the next version of the extension.

Regards,
ARI Soft

Hello,

"ARI Magnifier" v. 2.0.0 can be integrated with different lightbox extensions. See it in action on our demo site.

PS: Happy New Year :)

Regards,
ARI Soft

Thanks for the update. Looks great, well done. Unfortunately I had to use something else for the current project but I'm sure I'll use it in the future, particularly like the flickr/picasa integration. Thanks again for this.

Hello,

First, thanks for an excellent and cheap product! :-)

The demo looks very nice, and the popup effect on the gallery part is exactly what I'm looking for.

I have two questions:
a) How do you do that?

b) As an extension of a), will I need to buy another Ari product to make it work?
I'm looking for a solution that makes any sort of popup from the image gallery, but I would not like to buy more products.

Thanks in advance,
-Tobias

_____

Hello,

"ARI Magnifier" extension can be integrated with the next lightbox extensions:

ARI Sexy Lightbox

ARI Colorbox

ARI Pretty Photo

ARI Fancybox

Core Joomla! lightbox (it is free and not require to buy additional product)

RokBox (it is free plugin)

Regards,
ARI Soft

Arh! How silly of me, I didn't look closely enough. :blush:

I apologize for taking your time, and thank you again for excellent support an products.

_____

On your Lightbox demos you can click for a popup.
But I would like to use the magnifier on the popup to get an even higher resolution. When you only could use the magnifier for the thumbnails the resolution to the popup would be the same. When you really like to see details for example of a painting it would be good to have 3 resolutions in combination with a lightbox. Is there a way to to this ?

_____

Thank you for the quick answer. But this ability would really make sense for many uses. May be something for the future.

_____

When you imagine the bigger image on this page would be the popup then you will see what kind of fantastic gallery you could build with your magnifier: http://christahillekamp.com/en/people.html
