determing time to answer question

Posted by lpolak - 2009/04/03 07:41

_____

Well, hopefully this is my last problem to solve! I can't change the 'Question time' setting. Whatever number i enter (60 or 200 doesn't matter) every question has to be answered in 10 sec. on the website. That's too short. Is there something I am missing?

_____

Hello,

Check time setting for question category, please. If it doesn't help then provide access to your Joomla backend, please.

Regards,
ARI Soft
