
Purchase process help

Posted by admin - 2008/12/08 11:05

The purchase process contains two phases: creating order on our site and entering payment information on 2CheckOut site. All payments on our site are processed by 2CheckOut payment processor. It accepts credit cards and PayPal payments.

If you are purchasing ARI Soft product first time or unsure how to do this please follow the steps below:

1. This screen you should see when extension is added to order and you have proceeded to checkout.

2. The following page you will see after clicking "Confirm Order" link. If new page is not opened in 2 seconds automatically, this means that a popup blocker in your browser prevented it. In this case you should click "Click here to complete the order" button to proceed to 2CheckOut to make the payment.

PayPal payments

Posted by admin - 2010/11/06 17:25

2CheckOut system accepts credit cards and PayPal payments. It is possible to choose payment type on 2CheckOut page. If "PayPal" option is not available, change "Currency" to "EUR - Euro" or "USD - U.S. Dollar".
