## Suggestion about the 'ARI Quiz top results' module

Posted by Panefs - 2009/05/19 16:06

---

Hi.

I have installed Ari-Quiz on my new site and people really love its interactive learning features. Thank you Ari-soft team for this brilliant tool.

My only problem is with the 'ARI Quiz top results' module.  
There is a Count field but it doesn't seem to work the way (I believe) it should.  
No matter the figure in the module's Count field, it always displays 1 entry only.

Example: 5 users scored 100%  
The module displays only the first user who scored 100%  
The other users will never be displayed even if I change the count field to 5.

Note that the Count field works fine in the 'ARI Quiz results' module.

I hope it's fixed soon.

Again, thank you for this excellent tool.

Hello,

ARI Quiz v. 2.8.3 is ready and contains improved 'Top Results' module. Set 'Aggregate results' option on module settings page to 'No' and module will show multiple top results for each quiz.

Regards,  
ARI Soft
