
Multiple hot spot question

Posted by TemnyProrok - 2009/12/03 14:24

Is it possible to make the hotspot type of question to multiple? For example to find 5 differences from second picture in the question?

Hello,

Unfortunately, it is impossible now. We will think about adding this feature in future releases.

Regards,
ARI Soft

I could also use such a feature -- multiple hot spot areas defined on one picture, for example to click on all wrong things in the picture.
