
Display of Subcategories in the quiz category

Posted by moorsu - 2012/11/20 11:49

Currently, the quiz category layout displays single category.
This doesn't display the quiz in the corresponding subcategories.
It will be nice if there is an option to enable to display all the quizzes in the subcategories also.

Hello,

"ARI Quiz" v. 3.3.8 supports ability to select parent quiz category for "Quizzes" menu item type.

Regards,
ARI Soft
