
Quiz results: Users answers to Excel/Word

Posted by Jonte - 2014/07/08 20:07

It would be nice to get user's answers from specified quiz in Excel or Word so teacher could see them and then could check they answers. Now if they click for example To Excel-button, it only delivers statistic of that user, not the answers.

Now you can view one persons answers through View in Quiz Results, but it takes too much time to open every user at time.

:) Okay, this option is important

Also statistics results <http://www.ari-soft.com/ARI-Quiz-Feature-Request/52263-Statistic-Quiz.html>
