
Adding more choises in Drag\n Drop question type

Posted by Jonte - 2014/07/14 19:02

In Drag'n Drop question type it would be nice to add more answer choices then there are questions. That way the last answer choise couldn't be so easy to make up.

So here is an example:

Questions:

Animal

Plant

Bird

Answers:

Dog

Flower

Gull

Human

Computer

Now student who answers, can pair those that are right and left out those that are wrong

Our teachers hope that this would be possible soon.
