Question type: return file as answer
Posted by Jonte - 2014/09/03 16:16

_____

Our teachers hope that there would be a question type where students could return a file as an answer.

Normal question for students where there might be a file in question or just plain question and after students have opened, edited or created file, they could give it as an answer. File would be uploaded to server and teacher could see it and then grate it.
