different css for ari answers

Posted by caloche - 2010/07/04 22:00

_____

It would be really useful to attribute different template class (especially arianswer class) INSIDE a quiz - not for the whole of it-.

Question 1 >> standard template
Question 2 >> specific template (made for arabic letters >>> arianswer a lot bigger)
Question 3 >> back to standard template

(thread here : http://www.ari-soft.com/ARI-Quiz/4793-Add-a-css-class.html#4823)

thx in advance for thinking about it ! :-)
