## Auto save a quiz when the time is over

Hello

My students do the test and forget to watch the clock at the top of the screen. When the time is over, the test stops automatically without saving any answers of my student. I asked Mr.Admin to fix this problem but he said the extension doesn't support to save the answers automatically when the time is over. I need a function to save automatically the answers that they made at the end of time. Example: the test has 100 question - 60 mins, my students answer 50 question and the time is over but they forget to press the save button. The system will save 50 answers, calculate the score and show the result. and for more convenient, can you make the clock bar always on the top of screen? Thank you!
