
Quiz Img Problem

Posted by fbdogmus - 2020/06/05 16:53

Hello,
I translated this question with google translate. there may be errors. As you prepare a picture exam in practice, the media section is mixed. It would be great if the pictures were stored in the application's own body or to add the pictures to the question via url. Is there such a feature or will it come soon?

Hello,

Sorry, but the plugin works only with WordPress media manager.

Regards,
ARI Soft
