
User can decide where to send emailed results

Posted by stefstef - 2010/09/12 17:41

Hello

This is a request for future versions of Ari Quiz:

What I want to be able to achieve is this:

The user can decide to wich email address the results of his test will be sent. He can send it to his teacher, his father or what have you, but not only to the email address assigned to his registred account.

Hope this is possible

Thank you

Stefan Stefansson
