_____

I know this has been asked again and again but I can't get it to work.
I am using html mode enter the code

{arijscroll
width="100"
height="100"
speed="0"
delay="0"
skin="dotted "
className=""
direction="up "
ignoreLeave="true"
alternate="true "
stopOnMouseMove="true "
fontsize="0"}scrolling content{/arijscroll}

and when I preview it on my live site, nothing!?:unsure:

Is there anything I missed or I am doing wrong? I just want it to scroll in articles

Hello,

Can you provide access to your Joomla backend by email (info@ari-soft.com) that we can investigate this issue?

Regards,
ARI Soft
