ARI J Scroller not working - need help

Posted by AlecPuype - 2011/12/28 15:40

_____

Hi,

I just bought the ari smart content component; However, as a newbie to Joomla, I do not manage to get the ari scroll plugin working.

This is the code I added to my article:
{arijscroll
  width="100"
  height="100"
  speed="5"
  delay="5"
  skin="dotted"
  className=""
  direction="up"
  ignoreLeave="true"
  alternate="true"
  stopOnMouseMove="false"
  fontsize="0"}

De bedrijven ...

  ....gegeven.{/arijscroll}

The article does not scroll at all. However, the code has clearly impact. It truncates the article to the defined width and height. Moreover, it has the undesired side-effect that it changes the font size of other articles on the same page.

I checked the other forum articles, but did not find any solution. can you tell me how to proceed?

thanks

_____

extra info...i got this warning message on the front end, when trying to publish a scrolling article:

Warning: strstr() : Empty delimiter in
/home/bntqb/domains/bntqb.org/public_html/homesweethome/modules/mod_ariimageslider/mod_ariimageslider/kernel/Utils/class.Utils.php on line 146

_____

Hello,

Could you provide a link to a page where we can see a problem?

Regards,
ARI Soft

_____

I have found the problem...there is a conflict with Ari Image slider. When I disable Ari Image slider, scroller works fine.

Any solution to this conflict?
