## Show article linkable titles

Posted by pm4698 - 2012/10/04 12:32

---

Hi there.

I just purchased ARI Scroller and i see that inside the module i have to write a content. Is there any tutorial in order to show latest news linkable titles (from specific category) scrolling?

Thank you in advance

Hello,

"ARI Scroller" scrolls content which is entered manually.

ARI Slider and ARI Easy Slider can show articles from selected categories.

Thats too bad...

Actually i am looking for a module that it like this:  
[http://www.epo.gr/Home.aspx?a\\_id=256](http://www.epo.gr/Home.aspx?a_id=256)  
(under the top article slideshow)

A scroller which moves like this and shows article titles from a specific category.

Can you assure that a module you propose will do this job for me?

If you can wait several days, we will add ability to show articles from selected categories into scroller.
