
EasySlider error message

Posted by techgal - 2010/07/27 23:18

Help! Getting this message -

Fatal error: Call to undefined method AriKernel::addframeworkpath() in
/home/hamskeaa/public_html/newhamskea/modules/mod_arieasyslider/includes/kernel/class.AriKernel.php on line 80

Have version 1.1.2 installed

I also have AriScroller installed - it works fine. Is there a conflict?

I would like to use both.

Thanks!

This problem with 'ARI Scroller' extension. We'll update it within 2 days.

Regards,
ARI Soft

'ARI Scroller' has been updated. Download and re-install it, please. It should resolve issue with 'ARI Easy Slider'.

Regards,
ARI Soft
