Infos about your component

Posted by dom1706 - 2010/11/20 09:46

_____

Hello to the ARIS Soft team,

Just before buying, I would like to know if your component will suit my needs ...
I would like to insert testimonials (just text, no picture) inside an article (not in left or login position or ...).
I've created a section/category and I've put the testimonials in an article. The differents testimonails are separated by page break in this article.
Now I would like to insert your ARI Scroller in another article when I would like to display the testimonials ...

Is ARI Scroller a good choice and how to implement it in the right position (for example) of an article divided into 2 columns ?

Best regards.
Dominique,

_____

Hello,

Do you want to display in one article testimonials which are located in other articles with help the extension?

Regards,
ARI Soft

_____

Hello and thanks for your reply.
Yes, I would like to display in one article the testimonials located in another article (called 'testimonials' and in a section and category called also 'testimonials') by way of ARI Scroller.
English is not my native language so hope you really understand what I mean ;-)
Best regards.
Dominique,

_____

Sorry, but "ARI Scroller" doesn't provide this ability, but ARI Easy Slider
and ARI Paginator extensions can display articles from specific section(s) and categor(ies) into an article, but it requires to create new article for each testimonial.

Regards,
ARI Soft

_____

Hello again,

Thanks for you reply.

I've already looked at ARI Easy Slider and I like it!
I've understood I've to create a new article for each new testimonial (no problem, there are no thousands).
But do you expressely tell me I can put Easy Slider anywhere in my article ?? As the articles are in user5 position, I know it's easy to put an extension on top of a position, but I would like to be sure to be able to put Easy Slider on the right side and under a paragraph in my article ...
As I receive your positive reply to my questions, I'll buy it.
Best regards.
Dominique,

_____

"ARI Easy Slider" comes with "Content - ARI Easy Slider" plugin which helps to embed "ARI Easy Slider" into an article. You can place it any place in an article.

Regards,
ARI Soft

_____

Hello,
As I said to you, I've just bought Easy Slider.
I've downloaded your product.
When I go to 'Member Area', I have the link to download but I don't see how to have the licence key.
Do I have to wait a little bit ?
Best regards.
Dominique,

_____

Hello,

License keys are required only for our extensions which aren't GNU GPL license. 'ARI Easy Slider' isn't require a license key, just download and install it.

Regards,
ARI Soft

Hello again,

Thanks for all your help and for your extension. It works perfectly!

Could you plase tell me how I can remove the
 - tag in the beginning of each skided item ? With firebug, I see it's url("../images/arrow4.png")
Thanks in advance.
Dominique,

_____

Hello again,

Here's the link

In the beginning of each slide, you'll see a little square.
As I have no title for the testimonials, I don't need this square ...
Best regards.
Dominique,

_____

This square is added by site template styles. Add the following CSS rule to site template CSS file that avoid it:

```
ul.es-items-container li.es-news-item
{
  background-image: none;
}
```

Regards,
ARI Soft

_____

Hello again,

I need this square at other places in the template.
Is it a way not to display this only in Easy Slider ?

Thanks and best regards.

_____

Yes, provided code removes square only in "ARI Easy Slider" module.

Hello again,

Thanks for the great support !

I'm happy to have also bought another extension from ARI called Sexy Lightbox.

Best regards.

_____

Hello again,

Your ARI Easy Slider works perfectly in an article.
Now I would like to put other slider content in another article.
What do I have to do ? If I put {arieasyslider moduleId="100"} in my new article, I will display the slider from the first one
...
Best regards.
Dominique,

_____

Hello,

You can create as many module instance as you want with help Joomla! module manager. For this open "Extensions ->
Module Manager" page on Joomla! backend, click "New" button in toolbar menu and create new instance of necessary
module or choose existing module in module data grid and click "Copy" button in toolbar menu that create copy of
existing module. New module will have new ID, you can configure it and use in another article.

Regards,
ARI Soft

Hello again,

I've thought about this solution but I was not sure it was the good one ;-)
Thanks again for this great support.
