
aricsvtablecolumn parameters not working

Posted by renno - 2011/01/13 13:37

```
{aricsvtable file="data/csv/Ari_Mens1sts.csv" className="tbody" sortBy="Date2" sortType="SORT_NUMERIC"}
{aricsvtablecolumns}
{aricsvtablecolumn id="Date" alias="Date"}{/aricsvtablecolumn}
{aricsvtablecolumn id="Date2" hidden="true" alias="Date2"}{/aricsvtablecolumn}
{aricsvtablecolumn id="Match" alias="Match"}{/aricsvtablecolumn}
{aricsvtablecolumn id="Start Time" alias="Start Time" width="50%" pos="6"}{/aricsvtablecolumn} {aricsvtablecolumn
id="Venue" alias="Venue"}{/aricsvtablecolumn}
{aricsvtablecolumn id="Competition" alias="Competition"}{/aricsvtablecolumn}
{/aricsvtablecolumns}
{/aricsvtable}
```

I've had no problem installing the plugins, and implementing css, but I can't work out why the aricsvtablecolumn parameters aren't working.

Site is live at www.leinster.cc

Thanks

Hello,

Could you specify what table on this page is rendered by "ARI CSV Table" plugin?

Regards,
ARI Soft

Hello,

Your code contains an error. Use "{/aricsvtablecolumns}" instead of "{/aricvtablecolumns}"
