
how can I control the order of images?

Posted by baswolfs - 2011/01/14 15:05

I use fancy thumb to render the content of a directory in the media folder:

```
{arifancythumb srcDir="images/stories/Bas" includeSubDirs="true" thumbWidth="300" thumbHeight="175"
hideOnContentClick="false" zoomSpeedIn="500" zoomSpeedOut="500" overlayShow="true" overlayOpacity="0.5"
autoThumb="true"}
```

I cannot seem to control the order in which the images are presented. How can I set these? (e.g. alphabetically)

thanks,
Bas

Hello,

"ARI Fancy Thumbnail" plugin from "ARI Smart Content" package doesn't provide this ability. It can be done with help ARI Fancybox extension.

How can it be done in Ari Fancy Thumbnail? Can it be configured in the line of code above?
Thx

"ARI Fancy Thumbnail" doesn't provide this ability. You can submit feature request here and we will implement this ability in a future release.

Indeed, I mistyped the name.
how can it be done in Ari Fancybox? I would like to use it like the car gallery on your website.
Thx

Order type can be set in "ARI Fancybox" module settings or with help "sortBy" attribute of {arifancybox} tag if "System - ARI Fancybox Anywhere" plugin is used. The extension can sort images in the following order:

- by file name;
- by last modified time;
- random order;

in ascending or descending direction.
