
utf-8 encoding

Posted by RomanB - 2009/01/29 14:11

Hi, I got problem using csv file containing czech language characters like Ě, Ě™ Y.

In my ARI CSV Table plugin I set input encoding to utf8.

Any idea?

Thanks

RomanB

Hello,

Can you send your CSV file and plugin code which you are used by email?

Regards,
ARI Soft

Hi, files have been sent.

Thanks in advance

Hello,

If your PHP installation contains 'iconv' extension then you can use not only utf-8 encoding, but then indicate inputEncoding for ARI CSV Table.

Yes, this works for me! Thanks a lot!

```
{aricsvtable file="your_csv_file" inputEncoding="CP1250"}  
{/aricsvtable}
```

Hi, me again

i also have a problem with utf-8 encoding but i cant afford to open 100+ csv files and save them every 2-3 days when i export them from excell datasheets.

some solution?

Hello,

Can you sent one of your CSV files that we can help you. And say, please, in which encoding it saved.

Regards,
ARI Soft

Re:utf-8 encoding

Posted by vanka - 2009/02/09 14:44

ok, sent on info@

i make csv files from excell (with ASAP Utilities plugin), export datasheets in separate csv files, but i dont know what encoding it use.

when i open one file and save them in utf-8 encoding everything was fine but like i wrote on first post that means lot of work and i need to response quickly.

tables are prices for printings in local Serbian curency

Re:utf-8 encoding

Posted by admin - 2009/02/09 15:02

If 'iconv' extension for PHP is installed, you can add the following parameter to {aricsvtable} code:

inputEncoding="CP1250"

Re:utf-8 encoding

Posted by vanka - 2009/02/09 15:09

how and where can i check
If 'iconv' extension for PHP is installed

=====

Re:utf-8 encoding

Posted by admin - 2009/02/09 15:13

Go to your Joomla backend and open page Help->System Info->PHP Information. And check contains it iconv section or not.

Regards,
ARI Soft

:)
knew you help

find this

iconv
iconv support enabled
iconv implementation glibc
iconv library version 2.3.2

Directive Local Value Master Value
iconv.input_encoding ISO-8859-1 ISO-8859-1
iconv.internal_encoding ISO-8859-1 ISO-8859-1
iconv.output_encoding ISO-8859-1 ISO-8859-1

=====

Re:utf-8 encoding

Posted by admin - 2009/02/09 15:22

Then inputEncoding="CP1250" parameter must help you. Try it and let us know about results, please.

=====

Re:utf-8 encoding

Posted by vanka - 2009/02/09 15:26

:(

when i insert inputEncoding="CP1250" page show errors

and ...

when i change CP1250 to UTF-8 it look like before (no Ñ™, , ...)
