Format and CSS Questions

Posted by shamroclkllc - 2011/01/30 02:07

_____

I am curious in how to modify the CSS for the FancyBox.

I have attached an image showing what I am looking for, but basically I need to know where the image files are stored and where to modify them.

And I really need to add padding to the content.

Here is the code I am using:

{arijfancybox width="350" height="200" title="Content"}
{arijfbicontent} Info {/arijfbicontent}
{arijfbocontent} Testing this Feature {/arijfbocontent}
{/arijfancybox}

_____

Hello,

Image for close button is located by the following path:

/plugins/content/arismartcontent/content/ari_jfancybox/js/style/fancy_closebox.png

Where is some unique string. Add the following CSS rules that add padding and hide caption (It can be add to CSS template in "CSS Templates" section on component backend):

div#fancy_div
{
 padding: 5px;
}

div#fancy_title
{
 display: none !important;
}

Regards,
ARI Soft

_____

Brilliant!!!

As always, the support here is better than any other Joomla extension I have ever used!

Thanks, resolved my issue in one shot!
