## Single Thumb Launch Gallery

Posted by shamrockllc - 2011/01/30 11:49

---

I am curious, how can I have one thumbnail that opens a gallery to a complete folder of images?

I have limited space on the page I am placing this thumb . . . but I need users to be able to scroll through all the images I have uploaded to the directory.

Please explain carefully, as I am new to this.

Here is the code I am using:

```
{arifancythumb src="/images/maps/051.png" srcSmall="/images/maps/wv.png"
title="Map"
thumbWidth="45"
thumbHeight="30"}
```

Hello,

The plugin doesn't provide this ability, it can show all images from folder(s) on a page. Functionality which you need provides by the next our extensions:

ARI Sexy Lightbox  
ARI Colorbox  
ARI Pretty Photo  
ARI Fancybox  
ARI Image Popup

I am still not seeing how to accomplish what I need to to. Sorry for my lack of knowledge, but I need a lot of guidanace (LOL).

I think I need to clarify.

You can see it in action at:  
[www.shamrocklandservices.com](http://www.shamrocklandservices.com) and click the Properties Link at the top.

I have a table . . . In that table there is a column for Maps.  
Some properties only have one map so FancyBox was an easy solution, you can see that by clicking the image of the State, that it opens the map.

However, some of my entries have 2-3 maps that need to be viewed. I need to figure out a way to offer a gallery of some type for each of these that have multiple images. So I will need each link to show images in a different folder than the link above it.

Thanks so much for you help on this.

"ARI Fancy Thumbnail" plugin doesn't provide this ability. It can show all images from folder(s) on a page or only specific image. It can not display one image and then display other images from folder into lightbox. This ability provides extensions from our previous post.

Do any of the plugins allow this type function?

I found a work around, but if you can think of a good way to accomplish this, I would love to know.

Sorry, but "ARI Smart Content" doesn't contain plugin which supports the possibility.
