
Appearance in google chrome

Posted by vanka - 2009/02/09 13:57

it look like Google CHROME dont read all css styles on first appearance.
When i reload page everything is ok

how that come????

Hello,

Can you say version of Google Chrome and url where we can see this issue?

Regards,
ARI Soft

I dont know what version is it but its not beta (downloaded 2 or 3 weeks a go)

page is
http://www.printall.rs/index.php?option=com_content&task=view&id=21&Itemid=55

We have checked it in Google Chrome v. 1.0.154.48 and all works fine. You can see version of your Google Chrome if click by 'Customization' icon and choose 'About Google Chrome' menu item.

SOLVED

i was trying to make smaller css files so i separate some styles in undefined class (was thinking that thay will apply on every table)

thanks anyway
