## ARIJDIALOG php error

Posted by mniederm - 2009/02/09 21:43

---

Hi, I use ARIJDIALOG on my site. The most parts of the site are created with PHP, but when I write the arijdialog part with php echo ARIJDIALOG is not working. This sounds strange but I have tried it several times. When I use it with echo it is not working, only the text '{arijdialog width ....}' is displayed on the screen. Till now it worked for me, I splited it php html php but now I have to generate it dynamical and I have no workaround. Could you please solve this?

Thank you:

Example how I make it now:

```
Produkt: '.$idproduktselected.';
?>
```

```
{arijdialog width="700" height="500" title="Produkt updaten" resizable="true" draggable="true"}
{arijdcontent title="Modal dialog"}
```

```
{/arijdcontent}{arijdocontent}
```

Hello,

Can you say link where we can see code which shows instead of ARI JDialog.

Regards,  
ARI Soft

Hi, you can see it on the page:

<http://www.aktionsfinder.at/aktionsfinder/meine-einkaufsliste.html>

with the user test pw test

,there I have made a test for you one time in HTML one time in php echo HTML.

```
{arijdialog width="560" height="260" title="Notiz" resizable="true" draggable="true"}
{arijdcontent title="Modal dialog"}
```

```
ARI Test
```

```
{/arijdcontent}{arijdocontent}
```

```
TEST
```

```
{/arijdocontent}{/arijdialog}
```

---

---

Hello,

It shows PHP error

'Parse error: syntax error, unexpected T\_ECHO, expecting ',' or ';' in  
/home/aktionsf/public\_html/aktionsfinder/plugins/content/DirectPHP.php(49) : eval()'d code on line 2'

It seems that it is incorrect PHP expression.

Hello come one, dont think i am stupid, I have added this code to the site because you wanted to know what happen when I insert this with php. Please try it by your own, because you can see from the code which I have added that this could not happen a php error. Please do something and do not thorough things away.

Hello,

We have installed Direct PHP plugin v 1.55 on our server and try code which you type earlier. And all works fine. Say, please, which version of Direct PHP plugin you are used? But in any case, it seems that this problem in Direct PHP.

---

Hi, when I switch it off the code is printed on the page:

```
.....{arijdialog width="560" height="260" title="Notiz" resizable="true" draggable="true"} {arijdcontent title="Modal dialog"} ARI Test {/arijdcontent}{arijdocontent} TEST {/arijdocontent}{/arijdialog} {arijdialog width="560" height="260" title="Notiz" resizable="true" draggable="true"}{arijdcontent title="Modal dialog"}ARI Test{/arijdcontent}{arijdocontent}TEST{/arijdocontent}{/arijdialog} {arijdialog width="560" height="260" title="Notiz" resizable="true" draggable="true"} {arijdcontent title="Modal dialog"} {/arijdcontent} {arijdocontent} {/arijdocontent}{/arijdialog} {arijtabview saveState="false" cookie_expires="1"} {arijtab title="Meine Aktionen als Liste"}.....
```

---

It seems that ARI Smart Content runs before Direct PHP, change 'Order' property on 'Plugin Manager' page in your Joomla backend.

Hi,

now I have changed the order of ARI Plugin and Direct PHP Plugin and it works, that I can add ARI Tags with php, without php error, but now I have another error on the page which is really bad and it would be very important to solve it soon.

Now when there are more rows in the table nothing will be shown on the site. Now my main site is empty please solve it soon!!!!!!!!!!!!

This site is empty, but uses the same code as the 'getraenke' page, the only difference is, that at the first page are more categories and therefore more rows, there should be 149 rows

<http://www.aktionsfinder.at/aktionsfinder/alle-aktionen.html>

This site has 35 rows and it works

<http://www.aktionsfinder.at/aktionsfinder/aktionen-nach-produktgruppen/getraenke.html>

Please solve this soon !!!!!!!!!!!!!!!

---

---

I have now changed the plugin order of direct php and ari again, that my site works with the most important parts. With this change one main site do not work, please provide me with a new package of arismartcontent which I can install, that the php error is solved. I can not change the file you sent me manually, I don't know why but we talked about it some time before.
