## ARIJDATATABLE and ARIJDIALOG

Posted by mniederm - 2009/02/12 22:14

---

Hello,

I want to use ARIJDATATABLE in combination with ARIJDIALOG is that not possible.

I tried it see page:

<http://www.aktionsfinder.at/aktionsfinder/alle-aktionen.html>

First now it is very slow and second it do not work.

Part of code:

```
/* Produktaktionen in Listenform */
if ($anzahl_produktaktionen > 0 ){
echo '{arijdatatable bPaginate="true" bLengthChange="true"}Produkt ZeitraumPreisEinh.Vergl.MinMarkt';
if ($userid != 0)
{
echo " ";
}
echo " ";
for ($i = 0; $i < $sql->rows; $i++){
    $sql->Fetch($i);
    $positionlist = 'liste' . $sql->data;
    echo " ";
    echo '{arijdialog width="350" height="200" title="Aktionsdetails" resizable="true" draggable="true"}{arijdicontent
title="Modal dialog"}';
    echo " . $sql->data.' ' . $sql->data.";
    echo '{/arijdicontent}{arijdocontent}';
    echo 'Inhalt';
    echo '{/arijdocontent}{/arijdialog}';
    echo " ";
    echo " . $sql->data.' - ' . $sql->data.";
    echo " . $sql->data.'Ð, '";
    $menge = $sql->data;
    /* Marke und Bezeichnung */
    /* Preis */
}
}

```

.....

I deleted this code from my site because it slowed it down too much. But it nevertheless the answer would be great.

It seems that you load many records from database. ARI JDataTable plugin works on client side and javascript can't process this number of items.
