
Fatal error: Call to undefined method JAdministrat

Posted by shanshan51 - 2011/04/19 14:49

Please help I am getting the following error when installing to Joomla 1.6. PHP extensions already added to .htaccess.

Fatal error: Call to undefined method

Fatal error: Call to undefined method JAdministrator::getSiteURL() in
/home/content/26/7534326/html/joomtest/administrator/components/com_arismartcontent/kernel/Joomla/class.JoomlaBridge.php on line 9

Hello,

The extension is compatible with Joomla! 1.0 and Joomla! 1.5 only. We are working on new version of the extension (v. 2.0) which will be compatible with Joomla! 1.6. It will be ready within a month.

Regards,
ARI Soft

Ok thank you. I will have to go with another solution. Joomla.org said yours was already 1.6 compatible. How can I get a refund?

Joomla.org can't say that the extension is compatible with Joomla! 1.6 because it is not present in JED.

PS: About refund, contact us by email.

Regards,
ARI Soft
