
Still asking for license

Posted by macgyver - 2011/04/26 16:58

Hello,

I generated and filled a TEST license for domain liad-alger.fr

But when I clic on "plugins" tab (or menu) I still get the license tab with the filled license already registered (valid till 2011-mai-16).

WHAT'S WRONG ?

TIA

Hello,

Could you send screenshot of "License" page with browser's address bar by email?
