
aridatatable fatal error

Posted by ultravelvet - 2009/03/12 20:27

complete newbie here. i'm trying to use the aridatatable.

i created a folder and placed my csv file there (it's quite large and will get larger as time goes on).

i created an article and loaded this code:

```
{aridatatable}
{aricsvtable file="indexdata/Stradinfo-081115.csv" delimiter=";"}
{/aricsvtable}
{/aridatatable}
```

on the frontend, when i navigate to the article, i receive this error:

```
Fatal error: Allowed memory size of 33554432 bytes exhausted (tried to allocate 4335665 bytes) in
/home/g4g303/public_html/cauer/plugins/system/sef.php on line 62
```

please let me know what i'm doing wrong.

thank you,
lisa

Hello,

Can you provide this CSV file by email info@ari-soft.com ?

Regards,
ARI Soft
