Complete title
Posted by MILORD65 - 2009/03/14 17:57

_____

Hello,

On the Ari Jaccordion and in the Ari Jnews slider complete title of articles does not appear in tabs. The beginning only seems followed by dotted lines. How make appear the titles in its entirety?
Can anyone help me?
Thanks

_____

Hello,

Use {articleTitle}{$title}{/articleTitle} instead of {articleTitle}{$title|truncate:50:...}{/articleTitle}

Regards,
ARI Soft
