SQLtable don\'t show up on article

Posted by oswo - 2009/03/30 09:42

_____

Hello,

I've copy and paste the code from a working SQLTable module to an article, but it doesn't show up.
It only works in modules

_____

Hello,

If you are used WYSIWYG editor then check that plugin code in article don't contain unnecessary symbols because
when you use copy-paste editor can add some unnecessary symbols. If problem still appears then provide access to
your Joomla backend, please, by email info@ari-soft.com

Regards,
ARI Soft
