#### Using JFancyBox for Video

Posted by larryp - 2009/04/01 05:08

I am trying to use the fancybox popup to show a video. Is this possible? Becasue when i use the following code, the popup appears, but not the video. Everything else works, I just get a "?" instead of the video.

{arijfancybox width="522" height="308" title="Dentist"} {arijfbicontent} {/arijfbicontent} {arijfbicontent} {/arijfbocontent}{/arijfancybox}

Hello,

It's incorrect place video in IMG tag. Use the following code, please:

{arijfancybox width="522" height="308" title="Dentist"} {arijfbicontent} {/ariifbicontent}

{/arijfbocontent} {/arijfancybox}

{arijfbocontent}

Regards, **ARI Soft**

Sorry, that still doesn't work!

There is now no "?", but the movie still does not appear. Contextual menu says 'movie not loaded'

### Re:Using JFancyBox for Video Posted by admin - 2009/04/01 11:02

Can you provide access to your Joomla backend by email (info@ari-soft.com) that we can help you? It seems that you specify incorrect url for flash file.

Regards, **ARI Soft** 

## Re:Using JFancyBox for Video Posted by larryp - 2009/04/01 11:10

Not a problem with the url. I can embed the same movie using the JoomlaWorks AllVideo plugin without any problems using the same path to the video as above. However I would prefer to use the ARI JFancyBox. I can't give access to the site as it is on my computer only (localhost).

# Re:Using JFancyBox for Video Posted by admin - 2009/04/01 11:42

You can use ARI JFancyBox with AllVideo plugin. Use the following code:

{arijfancybox width="522" height="308" title="Dentist"} {arijfbicontent}

{/arijfbicontent} {arijfbocontent} {flv}Dentist01{/flv} {/arijfbocontent} {/arijfancybox}

Regards, ARI Soft
