
1 remaining error in mod_ariprettyphoto

Posted by Merlin - 2011/06/17 03:13

One of our websites using mod_ariprettyphoto for displaying Flickr photos is BROKEN now, due to a recent upgrade to the server's PHP as far as I can tell.

We started getting the following errors in ARI code:

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/phpFlickr.php on line 90

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/phpFlickr.php on line 322

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/phpFlickr.php on line 391

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/phpFlickr.php on line 460

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/PEAR/HTTP/Request.php on line 402

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/PEAR/HTTP/Request.php on line 720

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/PEAR/HTTP/Request.php on line 733

Deprecated: Assigning the return value of new by reference is deprecated in
/home/jcsmrste/public_html/modules/mod_ariprettyphoto/includes/kernel/Flickr/PEAR/HTTP/Request.php on line 778

So I updated tonight to mod_ariprettyphoto version 1.5.20 in hopes that you've fixed it by now, but that didn't help.

So after Googling around, I found that for most cases, I could remove the "&" from the new() and not try to use a reference, and that made the errors go away and the code apparently still works okay.

HOWEVER -- There is 1 remaining error that will this solution does not work for:
modules/mod_ariprettyphoto/includes/kernel/Flickr/PEAR/HTTP/Request.php on line 733

Help? Can you please provide an updated module that works with PHP 5.3.6?

Thank you.

Hello,

Download and upgrade the module. It should help.

Regards,
ARI Soft
