
How to start

Posted by hoekstrab - 2011/08/07 07:43

Hello,
i purchased ARI Smart Content: DataTable Pack but i cant seem to start it up.
Pleace help me, how do i set the first steps.

I installed it in mij joomla site and what is the next step.

It sounds stupid maybe but i dont see it

Thanks in advance.
Bert

Hello,

Some usage tips can be found here. In brief, the extensions contains a lot of plugin which are used as most of Joomla! content plugin. Place plugin code in an article and it will be replaced on your with necessary widget. Sample of code for each plugin can be find on plugin settings page in "Description" field.

Regards,
ARI Soft

Hello Admin,
Thanks for the quick reply.
When i past the code in an article nothing happens.
I checked the plugin but it is activated.

I have a file from EXCEL and saved it as CSV. How do i get it in an article.
I can copy / paste the cells into joomla and then?

When i put this code into my article nothing happens.

```
{aricsvtable file="data.csv"}
{aricsvtablecolumns}
{aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
{aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true"}
{coltemplate}{$NAME} - {$ID}{/coltemplate}
{/aricsvtablecolumn}
{/aricsvtablecolumns}
{aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"}
{/aricsvtable}
```

Kind regards
Bert

Hello,

Sorry for the delay. Could you explain what you mean under "nothing happens"? You see nothing, see plugin code or something another? Have entered license key in "License" page on component backend? If you use a WYSIWYG editor, switch it to plain text mode and check that plugin code is correct because WYSIWYG editors can add extra HTML code in design mode.

PS: If you provide link to page where we can see the problem and temporary access to your Joomla! backend by email, we will investigate the problem in more details.

Regards,
ARI Soft

I have the same problem. I am using Joomla 1.5.23 and when i use the code below it turns my page into a gray full screen. PLEASE HELP!!!!

link is the following. <http://www.globalcompinc.com/newark-orders.html>

```
{aricsvtable file="data.csv"}
{aricsvtablecolumns}
{aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
{aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true"}
{coltemplate}{$NAME} - {$ID}{/coltemplate}
{/aricsvtablecolumn}
{/aricsvtablecolumns}
{aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"}
{/aricsvtable}
```

Hello,

Try to install PHP Settings plugin and increase value of memory_limit PHP option. If it doesn't help, could you provide temporary access to your Joomla! backend by email that we can investigate the problem?

Regards,
ARI Soft
