
arijdatatable sorting

Posted by asukhu - 2011/08/17 02:23

Hi,

I have a table with multiple columns and I would like to sort those columns. The first column sorts perfectly(asc and dsc), the other columns only sort once but to do the reverse sort it get stuck showing "Processing". Any idea how to sort multiple columns.

Thanks.

Hello,

Provide link to page please where we can see the problem. It can be a conflict with a 3rd party extension.

Regards,
ARI Soft

The problem occurs because several jQuery instances are loaded on your page. Install "System - ARI Smart Content" plugin (you can find it here on F.A.Q. tab) instead of "ARI Smart Content" content Joomla! plugin. After this open "ARI JQuery Loader" plugin settings and set "Needs jQuery load" parameter to "No". It should resolve the problem.

PS: If you wish you can provide temporary access to your Joomla! backend by email and we will help to configure the extension.
