
Upload problem on with Smart Content

Posted by msm_portata - 2011/08/17 22:28

When I attempt to upload the zip file, I get a blank page.

Specifically, I go to "Upload Package File", select the com_arismartcontent.zip file and click the Upload & Install button. That takes me to this URL.

http://xxxxx.com/administrator/index.php?option=com_installer&view=install

I unzipped the contents on the server itself and tried to use the Install From Directory method but got the same results with the black page.

I am running Joomla 1.6.5 with PHP 5.2.10 and MySQL 5.1.40.

php.ini settings:
max_execution_time = 120
max_input_time = 60
memory_limit = 256M

I have had no problems uploading other zip files.

Hello,

Sorry, but currently the extension is not compatible with J! 1.6.

Regards,
ARI Soft

Heck.

Is there a date for when it is likely to be 1.6 or 1.7 compatible?

I really just need the data tables. Could I swap out the license for the Smart Content for the Data package?

Hello,

The extension will be compatible with J! 1.6+ within 2 weeks.

PS: Currently ARI Data Tables extension is compatible with J! 1.6+, but it is not possible to change license. "ARI Data Tables" is open source and doesn't require any license keys.

Regards,
ARI Soft

Great. I am looking forward to it.

In the mean time, is there a beta release that I could use?
